

HYBRIDair The Hideaway Air Management System

The unique design of HYBRIDair coilover lifts only requires a fraction of the air that a traditional air ride system would need to accomplish the same task. This provided the opportunity for our air management system to be compact & simplified, allowing you to easily tuck it away where it fits best, potentially even hiding it altogether. Thus, *The Hideaway* was born.

This new version of the Hideaway has taken the original concept to a whole new level, with all components pre-assembled and mounted to a light weight aluminum chassis. Our all-new quick-disconnect system locates the airlines and wiring harnesses together, enabling you to remove/reinstall the system in mere seconds.

Designed to support 1 pair of coilover lifts.

Includes:

- Laser cut and precision formed aircraft grade aluminum chassis with a durable powder coated finish, assembled with stainless steel fasteners
- 150 PSI / 2.03 CFM air compressor
- 2x Snobbish light-weight aluminum 0.37 GA tanks w/ pressure relief valve
- Backlit control switch
- Dual path electric valve manifold w/ pressure switch
- SMC DOT fittings
- 40' 1/4" DOT air line
- 40A relay
- 25A fuse & fuse holder
- Comprehensive wiring and accessory pack including thread sealant and air line cutter

SKU: MK3-HA

Dimensions: 18"L x 10.625"W x 4"H

Weight: 12.5 lbs
